

Dramm HydraSkid- Hydraulic Sprayer

The Dramm HydraSkid™ is a high volume hydraulic sprayer capable of performing a variety of tasks. The Hydra is perfect for the application of insecticides, fungicides, growth regulators, fertilizers, disinfectants and other chemicals. With a pump output of 7 gallons per minute, the HydraSkid offers enough volume to utilize a choice of guns, drench and agitate the tank simultaneously. The pump has a maximum operating pressure of 550 psi with a fully adjustable regulator. This allows for flexibility in choice of spray pattern, droplets and distances.

The HydraSkid uses a 5.5 HP Honda Gasoline Motor. This motor is close coupled to the pump, meaning that the motor and pump share the same shaft. This removes any belt, chain or gear drive

between the two and offers less maintenance and safety concerns.

The HydraSkid utilizes a convex reel design to prevent birdnesting of the hose. The reel features lock as well as a variable tension drag prevent the reel from freewheeling and spilling hose on the ground. The unit comes standard with either 150' or 200' of hose and Dramm's Turbo Gun, a superior patterned gun with easy adjustment and a light draw that causes less hand fatigue.

The HydraSkid is mounted on a rigid steel frame designed for easy fork placement for loading the unit into a pickup bed or onto a cart. All of the operation functions of the HydraSkid can be carried out from one end of the machine. The motor, pump, pressure regulator, pressure

gauge, filter and drain are located just below the reel, making operation easy. The 50 gallon tank offers a large opening with a filter basket and includes a sump with an anti-vortex baffle designed to minimize pressure drop when the tank volume is low.

Features

- 5.5 HP Honda Engine
- Close Coupled Pump
- Adjustable Pattern Turbo Gun
- Fully Adjustable Pressure to 550psi
- 150' or 200' hose
- Locking, Variable drag hose reel
- Agitation provided by pump bypass
- Easy to load and use skid design

Technical Data

Power Supply	5.5 HP Gasoline Motor
Maximum Pressure	550psi
Maximum Discharge Rate	7 gpm
RPM	3600 RPM
Pump Type	Triplex Piston Pump
Drive System	Direct Drive
Tank Size	50 Gallons
