

The TURBAIR MOTAFAN is an air-assisted spinning disc sprayer for low and ultra-low volume application of all formulations of chemicals. The sprayer reduces small even sized droplets which are carried in the airstream to the target.

The MOTAFAN is powered by a 2-stroke gasoline engine. The standard carry-frame allows use for longer periods of time without undue fatigue. The sprayer can efficiently apply water-based mixtures at both low volumes (normally 8 to 16 liters/acre) and ultra-low volume (ULV) formulations.

The TURBAIR MOTAFAN is designed primarily for the foliar application of insecticides and fungicides to crops grown indoors in glasshouses and polytunnels, and to outdoor crops, bushes and small trees (if spraying outdoors, the sprayer must ALWAYS be held downwind, NEVER attempt to spray against the wind). The

MOTAFAN's portability makes it perfect for greenhouses, nurseries, landscapers, dairy barns, hog barns and all other agricultural uses.

The TURBAIR MOTAFAN comes complete with a 1 liter solution tank, sufficient to cover up to 5,000 square feet. Simply fill the tank and spray.

**Features**

- Easy to use
- Portable machine
- No hoses or power cords to hassle with
- Efficient and economical operation
- Includes fatigue reducing shoulder carry frame
- Applies all formulations of chemical

**Technical Data**

Power Supply.....	22cc 2-stroke gasoline engine (developing 1hp at 6,500 rpm)
Weight -empty.....	15 lbs (6.8Kgs)
-ready to use.....	17 lbs (7.8Kgs)
Fuel Consumption .....	1.0-1.2 l/hr
Disc Speed .....	6,500-7,000 rpm
Flow Rate Range.....	1-3.6 oz (30-110 ml)/min
Droplet Size (VMD) .....	60-80µ (microns)VMD
Coverage Distance .....	15-20 ft (5-8 m)
