

Dramm Corporation Career Opportunity

CAD Drafter/Mechanical & Water Engineer

The Dramm Corporation (established in 1941) is a family-owned business and is the leader in the manufacturing and distribution of professional tools, equipment and engineered irrigation water management, treatment and delivery systems for Controlled Environment Agriculture such as commercial greenhouses and vertical indoor growing facilities that grow vegetables, flowers, pharmaceuticals, and more.

The Dramm Corporation is looking for an individual for the position of CAD Drafter/Mechanical & Water Engineer. Are you the individual who would rate themselves in the top 90% of their peer group using drafting software? You will prepare design layouts, P&ID drawings and configurations of equipment using SOLIDWORKS and AutoCAD, as well as getting your hands dirty helping to perfect the new designs.

This position is full time and has room for advancement as the company grows. A competitive salary and bonus are offered in addition to a matched 401k, profit sharing, paid time off, health insurance coverage and more.

Key Responsibilities

- Work within a team setting to create unique engineered treatment solutions according to customer needs.
- Create professional water treatment system drawings, including, but not limited to, P&ID's, system layouts, piping diagrams and isometric installation support drawings.

Qualifications

- AA or above degree related to system/process engineering.
- Proficient and confident in SOLIDWORKS and AutoCAD.
- Strong computer proficiency (MS Office software, SOLIDWORKS, AutoCAD).
- Ability to work collaboratively in the design process with multiple levels in the organization.
- A strong work ethic, an ability to self-start, and results oriented.
